DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The dependency of claim 4 is unclear. For one, it depends from a following claim, and, two, there is no claim 13. Claims 5 and 6 are also rejected under 35 USC 112, second paragraph, as claims which depend from indefinite claims are also indefinite. *Ex parte Cordova*, 10 USPQ 2d 1949, 1952 (PTO Bd. App. 1989).

Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claim recites the limitation "the nitrile." There is insufficient antecedent basis for this limitation in the claim. Claims 8-11 are also rejected under 35 USC 112, second paragraph, as claims which depend from indefinite claims are also indefinite. *Ex parte Cordova*, 10 USPQ 2d 1949, 1952 (PTO Bd. App. 1989).

Allowable Subject Matter

Claims 1-3 are allowed. The following is a statement of reasons for the indication of allowable subject matter:

Art Unit: 1621

The closest prior art appears to be US 5,932,769, cited by applicant in the IDS, which teaches multimetallic catalysts for the animation of alcohols to form alkylamines (abstract). The catalysts comprise Ni or Co in combination with Pd, Pt, Rh, Ru or Cu (column 2 line 5). A supported Ni/Pd catalyst is taught in Example 1 with results for the animation of butanol in Table 1 (columns 3 and 4). The instant Ni/Pd catalysts promoted with Zn, Cd, Cu or Ag are neither taught nor suggested, however. Nor would it have been obvious to one of ordinary skill in the art at the time of the invention to modify the catalysts of the prior art in order to arrive at those of the instant invention. There is no motivation to do so.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: HU 14908 (CAPLUS abstract) is cited to show a related catalyst and process.
